Confidential

This excellently performing branch is situated in an absolute prime location in Oud-Beijerland, directly adjacent to the large car park at the Dirk supermarket. This site serves as the central parking area for shoppers in the town centre, ensuring high visibility and a constant stream of potential customers.

The store opened in May 2019 and has achieved growth every year since. It is a fully independent branch with sound and stable business operations. The EBITDA is consistently above 20%, making this location financially very attractive.

The branch is situated in a district of approximately 30,000 inhabitants, with opportunities to expand the delivery area to surrounding towns, accounting for an additional 5,000 to 10,000 inhabitants. Moreover, the branch benefits from its proximity to Rotterdam, which ensures additional economic dynamism. The region shows

steady annual population growth, further underscoring its future potential.

Unique selling points

The store is part of a successful franchise concept that belongs to the strongest and most highly regarded franchise chains in the Netherlands. The brand is nationally known, highly professionally organized, and actively supports franchisees in marketing, purchasing, and operational optimization.

Moreover, the market in which this location operates is particularly promising: demand for delivered meals is expected to continue growing until at least 2035. Consumers are increasingly opting for convenience, quality, and speed, precisely what this formula caters to. This makes the investment in this location not only profitable but also future-proof.

Other

Growth potential for active entrepreneur:

- The store is perfectly suited for adding new delivery areas.
- There is room to integrate the Burger Kitchen shop-in-shop concept.
- With these expansions, annual turnover can grow to approximately €800,000 within a year.

The store is being handed over in the franchise formula's latest branding. The renovation is scheduled for late 2025 / early 2026. This upgrade has already been included in the planning and guarantees a fresh, modern look for the coming years.

The sale of this branch is taking place solely to shift the focus to the other branches.
