The brewery has been in existence for 10 years and is equipped with a state-of-the-art, semi-automatic brewing system with a capacity of 20 HL. It has its own filling line available for both kegs and various types of bottles.

The company is located in a surprising and authentic (rental) building, situated in a tourist town in the center of the Netherlands.

The production of the various specialty beers takes place according to their own recipes and is highly appreciated, as evidenced by the many reviews from visitors. Customers appreciate the brewery for its passion, beer experience, unique location, and friendly atmosphere.

Unique selling points

Revenue is largely generated through activities in the brewpub, supply to local and regional hospitality businesses, but also directly to consumers. Additionally, brewery tours and tastings are offered for groups. The location also serves as an event venue, perfect for parties and events.

The scale of the brewery's production capacity, currently only partially utilized, offers great potential to significantly expand revenue and profitability, thereby taking the brewery to the next phase.

Other

The expected revenue for 2026 is approximately €300,000 with an EBITDA of €75,000. There are two permanent employees and a layer of flexible staff.

The brewery is being offered for sale due to a lack of time and focus on the part of the current owners. As a result, the brewery is not receiving the attention it deserves, and much potential remains untapped.

A party is being sought that wishes to acquire the brewery in its entirety.

It is important that the buyer is demonstrably financially strong enough, so that, alongside the acquisition, there is also financial room to utilize the potential of the company.

Very suitable for a beer brewer who wants to expand his production capacity or, for example, a hospitality entrepreneur who wants to start producing his own beer.

UNIQUE ENTERPRISE with enormous potential!
