Company history/background

This clinic has been active in Amsterdam for 22 years.

The clinic focuses on high-quality botox, filler, and laser treatments.

Unique selling points

The clinic generates an annual six-figure revenue, while currently being operated by just one person working only 2 hours per day, 4 days per week. Expanding working hours could significantly increase revenue.

The practice features a spacious and professional setup of 131 m² with no fewer than 6 treatment rooms. This offers excellent opportunities to easily expand with additional specialists, such as skin therapists and additional physicians.

In addition, the clinic has a valuable database of approximately 4,100 clients. The acquisition concerns a full turn-key takeover, including all existing inventory and equipment such as treatment chairs, lasers, cabinets, desks, refrigerators, and computers.

The current owner (85 years old) is retiring but is willing to remain involved for approximately six months to properly guide the new owner and ensure a smooth transition.

Other

An excellent opportunity for a BIG-registered physician or investor: step in and start treating immediately, with both direct returns and significant growth potential.
