To be agreed

Earnings before taxes

€ 100.000 - € 250.000

Company history/background

This concerns an accountancy firm with a long track record, established in Drenthe. The current owner has reached an age where he/she wishes to sell the firm. The selling owner prefers an asset/liability transaction.

The client portfolio is diverse and spans various sectors, ranging from retail to healthcare, construction, administration, financial holdings, and natural persons. The size and structure of clients are generally straightforward. The services consist of managing financial administration & controlling, preparing annual

accounts, issuing auditor's reports, and tax return preparation. In addition to the entrepreneurs, one full-time equivalent (FTE) is employed. The activities are carried out in rented premises.

Unique selling points

The return is healthy. Given that part of the activities is outsourced, there is room for autonomous growth within the portfolio.

Other

The current owners are willing to transfer the customer base sustainably, subject to consultation.
