Company history/background

The company is a household name in the region. The current owner took over the business from his father over 20 years ago and works together with his wife and 5 employees (some part-time).

For acquisition: a food retail business, fish shop. Reputable company with years of proven performance. Profitable, long-term lease position.

Details:

- A very well-known name in the region, situated in a prime location with a rapidly growing population (new construction).
- A stable stream of customers for over 20 years
- The entrepreneur enjoys an excellent reputation.
- The shop has an excellent appearance and, with a prime visible location alongside other food businesses, is a highly sought-after spot.

The company is well-suited for a candidate who has already proven themselves in this sector.

Unique selling points

There is little significant competition at a distance. In recent years, the entrepreneur has won national awards in the sector on several occasions, garnering considerable (national) publicity. A great deal of new construction is currently taking place around the business location (mid-market rental and owner-occupied homes).

Other

We are seeking a candidate with proven experience in the fisheries sector. The seller is willing to remain on for a period to facilitate a successful handover.
