## Company history/background

The company is active in the high-end electromechanics and software market, must possess its own product and/or software, and its headquarters are located in the Netherlands. The company is in the start-up and/or scale-up phase, has generated its first revenue, and has growth potential. The acquisition of a majority stake in the company is the buyer's primary objective, but a minority stake is also a possibility.

The buyer is an international company active in related sectors.
