Company history/background

New construction, transformation and service

The electrical installation company in question is active across a wide range of sectors, including new construction, transformation, and services. The company is based and operates in a region with high economic activity and a population of over two million people.

Peace of mind regarding electrical installations

The company advises, designs, drafts, and installs for residential construction, property transformations, retail, offices, and new construction projects.

Unique selling points

Inventory and staff expansion

The capital sought will be used exclusively as working capital for the strategic expansion of inventory and for staff expansion, initially through hiring, and subsequently through permanent employment. In addition, discussions are underway regarding the acquisition of another electrical installation company (in an adjacent region). In the long term, this will result in a company with at least 30 employees.

Other

Participation

The capital requirement amounts to 150,000 euros. Participation in the share capital – provided it adds value – is certainly open for discussion.
