Company history/background

New construction and renovation

The construction company specializes in the new construction and renovation of homes. The company executes projects throughout the Netherlands with approximately 30 employees.

From structural work to finishing

- In addition to renovation and structural work (including villas), this construction company also focuses on complete finishing, including painting, plastering, tiling, sanitary installations, and maintenance work.

Unique selling points

Good return, more liquidity desired

The company is seeking an investor to expand its working capital, partly due to increased material costs (which could not yet be passed on to all ongoing projects).

Other

Financial partner wanted

- The sought capital of 200,000 euros will be used entirely as working capital. Participation in the share capital is negotiable.
