Company history/background

This concerns a construction/metal company primarily active in the production and assembly of metal (steel) frames, windows, doors, and facade elements. The turnover amounts to approximately 2.5 to 3 million euros, and the company works mainly on commission for construction and contracting companies.

The involvement of the current owner is to be determined by mutual agreement, with an openness to involvement extending for several years following the acquisition.

Unique selling points

The total workforce consists of 10 to 15 people, within a highly scalable flexible layer. A well-filled order book is available.
