€ 100.000 - € 250.000

Company history/background

The ideal company operates as an installation firm in the heating sector, with a focus on maintenance, inspection, and installation. The sought-after companies excel in a service-oriented approach and have loyal

employees on permanent contracts. The desired location is situated within the Rotterdam/The Hague/Leiden/Utrecht quadrilateral, with a predominantly private clientele.

Size and employees:

The company sought has an annual turnover of up to 1 million euros and employs approximately 5 to 15 employees (full-time/part-time). Transfer from the owner will take place in consultation as much as possible. A larger installation company is also attractive, provided the selling director-major shareholder remains involved.

A leading company in heating installation technology excels in high quality and excellent service. This company primarily assists private clients and is fully certified.

Armed with extensive knowledge of central heating boilers, district heating, underfloor heating, and water heaters, the company strives for the best possible flexible solutions, without the obligation of a fixed annual contract. With the necessary growth ambitions, the enterprise plans to expand by acquiring other companies.

Other

The intended transaction form is a full acquisition. However, the seller's input regarding the transaction structure is highly valued and will be discussed in consultation with the current owner. All responses will be treated with the utmost confidentiality, and if desired, a confidentiality agreement will be drawn up prior to further discussions.
