Company history/background

The company is an accessible and regular lunch spot, particularly for employees at the local business park and adjacent business parks.

The food truck (non-movable) serves its customers with fresh sandwiches, freshly prepared lunches, and soup, partly thanks to the direct connection with the kitchen of the adjacent party catering company (also selling). The business is stable, employing one staff member and with opening hours—and thus a focus on the lunch peak—

from Tuesday to Friday from 11:00 to 14:00.

The key figures for 2024 are:

- Revenue € 55,400
- Gross profit margin € 28,900 (52%);
- Net result € 8,600

Unique selling points

- Strategically located on a business park with high demand for lunch;
- Use of the professional kitchen of the adjacent party catering company increases efficiency;
- Easy-to-take-over concept with an established customer base;
- Extension of opening hours and expansion of the range.

Other

The interest offered concerns the assets and activities of the company, including the food truck and the use of kitchen facilities. The food truck is functionally linked to the adjacent party rental and catering company. This is also being offered separately. The latter also applies to the separate bicycle rental service.

The companies are preferably sold as a combination. The current owner wishes to transfer the operations to an entrepreneur with a vision for local foodservice.
