Company history/background

This search profile focuses on the acquisition of consultancy firms active within the domains of water (quality), green spaces, landscape architecture, and construction management. The ideal party is a company whose expertise and projects align seamlessly with sustainable area development, spatial quality, and a healthy living environment.

The client is a growing, multidisciplinary engineering firm with an integrated approach and a strong position in the Randstad region. The firm has stable and positive operating results, possesses financial strength, and a

broad client base. The team consists of independent, loyal, and highly educated personnel with extensive experience in the field. The organization is characterized by well-structured business processes and a large internal network.

We are a multidisciplinary engineering firm with an integrated approach and a nationwide presence, holding a strong position in the Randstad region. Thanks to stable and positive operating results, we possess both the financial strength and a solid client portfolio, making us ready for further growth. Our team consists of independent, loyal, and highly educated personnel with extensive experience within their respective fields. Combined with well-structured and sound business processes, our firm positions itself as a leading player within the sector.
