#### Asking price

€ 0 - € 2.500.000

#### Earnings before taxes

€ Loss - € making

### Company history/background

We are looking for companies in payroll, secondment, staffing, and back office that are ready for the next step. We would like to get in touch with organizations that want to grow but find their financial room is becoming limited, or entrepreneurs who are considering selling their company (partially or fully).

Both healthy, profitable companies and companies facing challenges, such as temporary losses or substantial

tax debt, are of interest to us. We enjoy collaborating on solutions and acquisitions that offer prospects for all parties.

As an investor, I have been active for over 30 years in buying, merging, and growing companies. We acquire multiple enterprises annually. I combine my experience as an entrepreneur with my background as a lawyer, allowing me to quickly assess what is needed to restore a company to health.

I invest exclusively with my own money. That means: no endless processes, no external funds, no delays. I can make decisions lightning fast and act immediately as soon as an entrepreneur wants to move forward.

Companies facing financial difficulties, stalling in growth, or running up against mounting debt, such as tax or financing pressure, are of particular interest to me. With my experience in restructuring, restarts, and complex situations, I can quickly add value and ensure continuity.

My approach is practical, discreet, and solution-oriented. Entrepreneurs can count on clarity, speed, and a party that truly knows what is going on.

## Unique selling points

- Own money, no funds, no delays. I work exclusively with my own capital. This allows me to make decisions without banks or investment committees. Fast deals, immediate clarity.
- Unique background as a lawyer. I combine entrepreneurship with legal acumen. As a result, I see opportunities and solutions that others miss. Shift gears quickly, structure tightly, and handle matters optimally.
- Direct decision-maker, no cumbersome process. I am not a corporate, a PE firm, or an incubator. One conversation. One analysis. One decision.
- Always focused on business continuity and employment. I think in terms of recovery, growth, and value creation for all involved. I create calm, structure, and perspective.

## Other

Fast, experienced, my own money, I invest in payroll and back office.
