Company history/background

The firm was founded in 1997 and has experienced stable growth since its inception. They excel in providing a "full-service" for SMEs across all legal forms. Thanks to collaboration with various specialists, the range of services on offer is extensive.

All core activities associated with a good and effective administration office are utilized by the clients. The

current team members are so well-trained that there is, and will continue to be, sufficient room to grow with existing clients as well as, certainly, with new clients.

Unique selling points

Specialization through a flexible structure that offers ample opportunity to handle matters for clients that go beyond annual accounts and VAT returns.

Other

The buyer is a party or person who wishes to start up in this industry and would like to temporarily make use of the current owner's "grey hair," but wants to chart his or her own course. Alternatively, the buyer is a more strategic party wishing to expand activities in the region.
