### Company history/background

The company was founded in 2020 and is active in the market for charging infrastructure for electric vehicles. In a short time, the company has grown into an established player in both the residential and business markets and has been generating a turnover of approximately €1.4 to €1.7 million per year for several years.

The company is active in the Netherlands and Belgium and serves a broad customer base. The company has

positioned itself as a service-oriented party that fully unburdens customers in realizing charging solutions. Over the years, an operational team has been built up and a strong online position has been achieved with a structural influx of leads via its own website.

Since Q4 2025, the company has started selling and installing home batteries, responding to the growing demand for energy storage and grid congestion solutions.

The company is engaged in:

- Sales and installation of charging stations for electric vehicles
- Realization of charging infrastructure for private customers
- Commercial installations for business premises and charging stations
- Project-based installations for employees of organizations
- Advice, planning, and complete peace of mind regarding charging solutions
- Since Q4 2025: sales and installation of home batteries

The company is active in both the B2C and B2B markets and operates with a fixed operational structure and experienced partners.

## Unique selling points

- Strong focus on service and completely unburdening customers
- Active in both the Netherlands and Belgium
- Combination of private and business clients
- Structural lead stream of approximately 350 to 500 leads per month via own website
- Strong online visibility through organic traffic and Google Ads
- Website, systems, and online channels fully owned
- Operational team and processes in place
- Home batteries as a new growth pillar with higher margins and scale potential

## Other

We are seeking a serious buyer with a strategic interest in charging infrastructure and energy solutions. Preference is given to a party that can create value through scale, synergy, or optimization of operations, procurement, and marketing.

Suitable buyers are installation companies, energy or battery suppliers, technical service providers, or entrepreneurs with experience in the EV and energy market.

The transaction may consist of an acquisition of 50% of the shares in collaboration with the current owner, or a full acquisition of 100% of the shares. In the event of a full acquisition, the current operationally active shareholder is willing to remain involved, in consultation, for continuity and knowledge transfer.

The buyer must be willing to further develop the business and invest in optimization and growth. Further information is available upon signing a non-disclosure agreement (NDA).
