€ 250.000 - € 500.000	

Company history/background

The company (partnership) was founded years ago and has evolved from a specialized laser clinic into a versatile skin and laser clinic. Over the years, it has built a strong market position in the Netherlands.

The company has extensive experience with high-quality laser hair removal, tattoo removal, and skin improvement treatments. It serves private clients (B2C). Clients are offered a customized treatment protocol, tailored to their individual needs and skin condition.

The company employs a team of approximately 14 people. The company operates independently, with management responsible for day-to-day management. The facility is located in prestigious buildings with modern treatment rooms equipped with state-of-the-art equipment.

The company's structure is geared towards further growth within its existing premises, but expansion with additional locations is also highly promising. The 2026 revenue forecast is approximately €1,500,000 with an EBITDA of over 30%. 100% of the shares are being offered for acquisition.

Unique selling points

The reason for the sale is that the owner wants to transfer the business, which he has built over the past few years, to a new owner who will continue to grow it. The current owner does not consider himself the right person to manage further growth and wishes to focus on other activities after the transfer.

This company is ideally suited for a strategic buyer looking to expand their current portfolio. It also offers excellent future prospects for a well-funded MBI candidate seeking to capitalize on growth and capitalize on favorable developments in this sector.
