The company operates as a small-scale residential facility and, as a youth care provider, specializes in offering care and support to young people aged 12 to 18 in a safe and familiar environment. Young people have a place to live and stay within the residential facility. There are 8 living spaces in the building, with room for more. The company does not provide treatment but guides the young people. The assistance for each young person is funded under the Youth Act. The contracts are with a dozen municipalities, particularly in the Northern Netherlands, and with a number of care institutions.

**Other**

The proposed transaction concerns the sale of 100% of the shares of the company. Overname in bedrijf holds a full sales mandate. Based on an NDA, an information memorandum is available upon serious interest. This transaction is strategically interesting for other healthcare companies. This could also be an interesting proposition for an MBI candidate with the necessary knowledge, youth care experience, and capital.
