Company history/background

The company is a car wash business with its own car wash tunnel and wash bays, and also operates a petrol station. The company has existed since 2007 and was founded by the current owner. A strong regional position has been established in the Northern Netherlands. The company provides its services to private customers (50%) and business customers (50%).

The organization is operationally run by 2 car wash employees. The current owner works limitedly in the

company and handles the administration himself. The company is located in owned premises which are also offered for acquisition.

The wash bays are used 25,000 times annually by visitors, and the car wash washes approximately 400 to 500 cars per week.

The turnover amounts to approximately €330,000 per year and the profitability is €175,000 EBITDA. 100% of the shares are being offered for acquisition. The company is based in the Northern Netherlands.

Other

The owner wishes to transfer the company to a new owner who will capitalize on its growth potential. Following a careful transfer, the current owner wishes to focus on other activities. This enterprise is attractive to larger companies looking to expand their operations regionally, as well as to smaller players or financially strong MBI candidates. Integration into an existing organization offers opportunities for economies of scale, while independent growth is also feasible. This growth is supported by the future expansion of the industrial estate where the company is located.
